EcoDiagnostics

Innovative Molecular Microbiology

## Associations

## Professional Partners

# EcoDiagnostics

### Wine Microbiology & Allergen Testing Services

Innovative Microbiological Solutions

# Wine Testing

- Traces of allergenic substances such as Caesin, milk and egg must be indicated on wine labels when exporting to certain countries unless they can be demonstrated free of residues
- Implementation of a program of laboratory verification is required to support labelling claims.
- Evaluation of microbial composition of both wine production environments and end product can help support maintain quality control

*EcoDiagnostics is proud to be working in partnership with Australian vintners to offer customised, practical and cost-effective microbiological quality control assurance and allergen testing programs*

# Custom Wine Testing Solutions

## Allergen Testing

- Based on proven commercial ELISA technology
- NATA accredited methods
- Fast and efficient turnaround times
- Total milk protein and total egg protein

## Wine Microbiology

- Identification and profiling of problematic yeast and bacteria using the latest in DNA-based profiling technology
- Specific DNA and microbiological methods to monitor for levels of known organisms (eg Brettanomyces spp)
- Fast and efficient results delivery
- Fully automated robotic laboratory
