EcoDiagnostics

Innovative Molecular Microbiology

## Associations

## Professional Partners

# EcoDiagnostics

## Air Quality Testing Services

Innovative Molecular Solutions: Using DNA for Yeast,  
Mould & Bacterial Detection and identification

## Who we are

- NATA accredited facility to ISO 17025
- All testing Australian standard compliant
- Offering a range of custom services with rapid result delivery
- State-of-the art & fully automated robotic laboratory facilities
- Customisable high and low throughput options

EcoDiagnostics is proud to hold NATA accreditation for identification of species using state-of-the-art DNA-based methods

## Yeast, Mould & Bacterial Identification Services

### Air Quality Testing

- Custom sampling solutions suited to air quality monitoring that are OHS&E compliant
- General workplace, enclosed environment, operating theatre and clean room testing
- Determination of air quality using state-of-the-art DNA based methods
- Ability to rapidly detect organisms that are un-cultivable using conventional techniques
- Total contaminant load testing or targeted detection of known problem organisms
- Rapid and cost effective identification of Bacteria, Yeast and Moulds using both DNA barcoding and real-time PCR based rapid identification methods
